SUMMARY

Motivated, detail-oriented computer science undergrad with an interest in front-end web development and software development.

EXPERIENCE

Summer 2017 **USAA Summer IT Internship**
Software Developer & Integrator

Worked on designing and creating internal RESTful Web Services using Java in an agile team environment.

2015 - Present **EXE COMPUTER SCIENCE CLUB**
Web Development Group

Collaborated with fellow computer science students to learn full-stack web technologies using MEAN stack.

Fall 2016 **UNDERGRADUATE RESEARCH ASSISTANT**

Used Mathematica 11 along with MakerBot Replicator to assist professor in utilizing 3D printing technology to attract future college students to the STEM field.

Fall 2016 **OBJECT ORIENTED PROGRAMMING**

Studied object-oriented design patterns, UML modeling, unit testing, encapsulation, inheritance, and polymorphism using IBM's Rational Software Architect program.

Spring 2016 **SOFTWARE DEVELOPMENT**

Developed an interactive Java RPG game with a team of 4 other students using an Agile approach. Utilized UML Diagrams to visualize class interaction along with Trello and GitHub to track our sprints and collaborate efficiently.

Spring 2016 **INTERNET SOFTWARE DEVELOPMENT**

Learned to create dynamic web applications with Python and the Flask framework, HTML5, CSS3, JavaScript and the JQuery library, as well as SQLAlchemy to implement database systems.

EDUCATION

Fall 2017 **BACHELOR OF SCIENCE**
Texas State University

- Major: Computer Science
- Minor: Applied Mathematics
- Overall GPA: 3.25

SKILLS

Languages
Java
Python
C++
HTML
CSS
JavaScript

Frameworks
Flask
Jquery
ReactJS
Pure CSS
Skeleton

Tools
GitHub
Trello
Git
Eclipse

INTERESTS

Raspberry Pi
Arduino
IoT
